

# Sink recommendations for AB09, AB10, AB11

Using a specially designed test method, Dyson engineers tested a wide range of sinks to evaluate the sinks with the best experience when used with Dyson Airblade Tap. Only Dyson Airblade Tap and sink combinations that had 1% or less splash on the user and surrounding areas were selected.

The user experience at the sink will be determined by the orientation of users hands. For the best experience, Dyson recommends customers use the Airblade Tap in-washroom communications to promote the best use of Airblade Tap.
